

COLOURS

REFILL MARKERS
FOR AIRBRUSHING

GREAT FOR MIXED
MEDIA INK PROJECTS

Drip Method

1. Uncap both ends of the marker.
2. Hold the marker in one hand, at an angle, with the flat side of the Broad or Medium Broad Nib up.
3. With your other hand, gently drip Various Ink drops onto the nib surface, allowing each drop to be absorbed before adding the next.

note: If overfilling occurs, use a tissue to absorb the extra ink. Use rubbing alcohol or Copic Colourless Blender to clean any spills & to wipe your marker clean.
